

CHENHAO HU

Shenzhen, Guangdong, China
+86 187-2005-6005 | xingzhehu80@gmail.com | github.com/Xingzhehu

EDUCATION

- **Harbin Institute of Technology, Shenzhen** *Sep 2023 – Jun 2027 (Expected)*
 - Bachelor of Engineering in Computer Science and Technology
 - GPA: 3.628/4
 - **Selected Core Courses:** Computer Systems (94/100), Advanced Programming Language (93/100), Calculus (93/100)

RESEARCH EXPERIENCE

- **Undergraduate Researcher** *Jun 2025 – Present*
*KLC Lab, Harbin Institute of Technology, Shenzhen / Supervisor: Prof. **Jing Li***
 - **Paper: CodeToRL: Mitigating Reward Sparsity in Code Generation via Multi-Perspective Token-Level RL**
1st Author *Under review at NeurIPS 2026*
 - * Proposed CodeToRL, a token-level RL framework for code generation that mitigates reward sparsity through multi-perspective hints, on-policy self-distillation, and future-aware dense rewards combined with execution feedback.
 - **Paper: Clean Code: Eliminating Code Smells in Code Translation with Anchor-to-Thought CoT Synthesis**
2nd Author *Under Review at IEEE TSE*
 - * Proposed and implemented CLEARTRANS, a reasoning LLM framework for smell-free code translation using Anchor-to-Thought CoT synthesis and dual-reward reinforcement learning.
 - **Paper: Bridging Functional Correctness and Runtime Efficiency Gaps in LLM-Based Code Translation**
3rd Author *ICML 2026*
 - * Implemented SWIFTTRANS, a two-stage LLM code translation framework, significantly improving both functional correctness and runtime efficiency across three major benchmarks.
 - **Paper: SuCo: Sufficiency-guided Continuous Adaptive Reasoning**
3rd Author *ICML 2026*
 - * Led the experimental validation of the SuCo framework across multiple benchmark datasets, successfully increasing the Response Accuracy by $\approx 3\%$, demonstrating the efficacy of the sufficiency-guided strategy.
 - **Project: Safety and Trustworthiness Testing of Large AI Models**
Shenzhen Natural Science Foundation Basic Research Key Project
 - * Devised a human-AI collaborative annotation framework utilizing LLMs for auto-generation and classification, successfully synthesizing cross-modal security data for real-world applications.

SKILLS

- **Languages:** Mandarin (Native), English (CET-6: 530)
- **Tools & Technologies:** Linux, pytorch, vllm, verl

AWARDS AND HONORS

- First Prize (Provincial Level), Chinese Mathematics Competitions for University Students *2024*

EXTRACURRICULAR ACTIVITIES

- **Volunteer**, Shenzhen Marathon
- **Table Tennis Club Technical Department Member**

INTERESTS

- Feet on the trail, lens on the world.
